Committee members:

In my statement this evening, I stated that I had requested a copy of the alternatives analysis prescribed in the original RFP. What I received instead was a site analysis that justified the Old Quarry Road location to a large extent because it was the only site that could accommodate the large combined building designed for speculative 35-year needs.

When I asked for the options analysis, I was told the site analysis served that purpose, which it clearly does not.

That exchange and the analysis are attached. Please include this email and attachments in the Committee's posted documents.

Regards,

Kirk
