Roof Mounted Solar

To All Bidders:

The following questions have been received;

*How many buildings can be used to reach the solar sizing you are looking to install? I see there are possibly three buildings on site. Is that correct? **There are three buildings on site; Salt Barn (western-most building), Garage 1 (southern-most building) and Garage 2 (Northern-most building). All roofs are available for installation, with the exception of the metal roof on Garage 2 (eastern-most portion of structure).***
