Connecticut Vaccination Summary

Ridgefield COVID-19 Task Force

Data downloaded from
https://covid.cdc.gov/covid-data-tracker/#vaccinations

Tuesday, January 26, 2021
1. Connecticut ranks #5 in administered doses as a percent of population.

2. Connecticut ranks #6 in distributed doses as percent of population.

3. Connecticut ranks #5 in administered doses as percent of distributed doses.

Conclusion: Connecticut ranks high in vaccines administered because it is doing an excellent job in administering doses that have been received from the Federal Government.

- Texas: 8.35%
- Massachusetts: 8.35%
- Hawaii: 8.35%
- Ohio: 8.35%
- Maryland: 8.35%
- Tennessee: 8.35%
- Iowa: 8.35%
- South Carolina: 8.35%
- California: 8.35%
- Pennsylvania: 8.35%
- Minnesota: 8.35%
- Arizona: 8.35%
- Illinois: 8.35%
- Wisconsin: 8.35%
- Kansas: 8.35%
- Alabama: 8.35%
- Nevada: 8.35%
- Idaho: 8.35%
- Missouri: 8.35%

People Who Have Received Second Dose (Fully Vaccinated)
People Who Have Received First Dose Only
Connecticut ranks #3 in People Receiving at Least One Dose

Data Source: https://covid.cdc.gov/covid-data-tracker
People who have received First and Second Doses (Cumulative)

**Connecticut: People With First and Second Doses (Cumulative as Percent of Population)**

Data Source: https://covid.cdc.gov/covid-data-tracker

**United States: People With First and Second Doses (Cumulative as Percent of Population)**
First and Second Doses Administered Each Day

Connecticut: First and Second Doses Administered Each Day

United States: First and Second Doses Administered Each Day

Data Source: https://covid.cdc.gov/covid-data-tracker
Introduction to Scatter Plot of Administered vs Distributed Doses

\[
\begin{align*}
\text{y-axis} & : \quad \frac{\text{Administered Doses}}{\text{Population}} \\
\text{x-axis} & : \quad \frac{\text{Distributed Doses}}{\text{Population}} x \frac{\text{Administered Doses}}{\text{Distributed Doses}} \\
\text{Red Diagonal Lines} & : \quad \text{Administered Doses} = \text{Distributed Doses} \times \text{Administration Efficiency}
\end{align*}
\]

1. The dashed lines can be thought of as ‘jet plumes’ showing the trajectory of each state since the previous CDC report.
2. Since the doses are cumulative, the dashed lines will always move upward and to the right.
Scatter Plot: Administered vs Distributed Doses

Cumulative Administered Doses vs Cumulative Distributed Doses

The open circles show the latest CDC data for each state.
The dashed lines (‘jet plumes’) show the trajectory for each state since the previous CDC report.
The solid Red lines show constant Administration Efficiencies.
