Connecticut Vaccination Summary

Ridgefield COVID-19 Task Force

Data downloaded from https://covid.cdc.gov/covid-data-tracker/#vaccinations

Wednesday, January 27, 2021
Connecticut ranks #3 among states in percent of population receiving at least one dose.

1. Connecticut ranks #5 in administered doses as a percent of population.
2. Connecticut ranks #5 in distributed doses as percent of population.
3. Connecticut ranks #5 in administered doses as percent of distributed doses.

**Conclusion:** Connecticut ranks high in vaccines administered because it is doing an excellent job in administering doses that have been received from the Federal Government.

\[
\text{Administered Doses Distributed Doses Administered Doses} = \frac{\text{Administered Doses}}{\text{Population}} \times \frac{\text{Distributed Doses}}{\text{Population}} \times \frac{\text{Administered Doses}}{\text{Distributed Doses}}
\]

Introduction to Scatter Plot of Administered vs Distributed Doses

\[
\begin{align*}
\text{Administered Doses} & = \text{Distributed Doses} \times \text{Administration Efficiency} \\
\left(\frac{\text{Administered Doses}}{\text{Population}}\right) & = \left(\frac{\text{Distributed Doses}}{\text{Population}}\right) \times \left(\frac{\text{Administered Doses}}{\text{Distributed Doses}}\right)
\end{align*}
\]

1. The dashed lines can be thought of as ‘jet plumes’ showing the trajectory of each state since the previous CDC report.
2. Since the doses are cumulative, the dashed lines will always move upward and to the right.
Scatter Plot: Administered vs Distributed Doses

Cumulative Administered Doses vs Cumulative Distributed Doses

- The open circles show the latest CDC data for each state.
- The dashed lines ('jet plumes') show the trajectory for each state since the previous CDC report.
- The solid Red lines show constant Administration Efficiencies.
